WELCOME TO E-Z STREET™!

In 2012, we're introducing our first brand-new steam locomotive in O Gauge, the *Baldwin 4-6-0*, which joins the Bachmann family of HO, N, On30, and Large Scale 4-6-0s. The O Gauge Baldwin 4-6-0 is available as a separate-sale product and is also included in three new ready-to-run train sets: *The Greyhound*, *Lake Shore Limited*, and *Christmas Special*.

Williams by Bachmann welcomes the *E-Z Street™* modular system that snaps together to create realistic one-lane or two-lane roads and intersections. Now your model town or city can get moving with the *E-Z-Street™* system and *E-Z-Street™* vehicles.

There's plenty of action in our *Traditional Line* with a variety of animated cars: new Operating Chase Cars featuring a cop chasing a robber or an elf chasing a reindeer as well as Log Dump Cars, Coal Dump Cars, and Box Cars with working figure. Nostalgic Operating Billboards and Operating Accessories in our *Golden Memories* line also help bring your layout to life.

With the Baldwin 4-6-0 locomotive and train sets, *E-Z Street™* system, operating rolling stock, and other new products, 2012 will be an exciting year for O Gauge modelers!

Christmas Special

Ready-to-Run Electric Train Set

Item No. 00323 • Suggested price: \$399.95

NEW

Re-live your favorite Christmas memories and create new ones with this festive set running around the tree. Our merry *Christmas Special* features a steam locomotive with die-cast boiler and chassis, three Christmas freight cars, snap-fit track with roadbed, and a powerful 80-watt AC transformer in a complete ready-to-run package.

Keystone Express

Ready-to-Run Electric Train Set

Item No. 00322 • Suggested price: \$299.95

The Pennsylvania Railroad was known as the “Standard Railroad of the World” and ran passenger service along the East Coast of the United States and as far west as Chicago. This set proudly wears a Pennsy Tuscan red paint scheme and features a dual-motor diesel locomotive, snap-fit track with roadbed, and a powerful 80 watt AC transformer in a complete ready-to-run package.

READY-TO-RUN ELECTRIC TRAIN SETS

TRADITIONAL
LINE

This complete and ready-to-run O gauge train set includes:

- Baldwin 4-6-0 steam locomotive and tender with operating headlight, smoke, flywheel-equipped motor, and digital True Blast II® whistle and bell sounds
- gondola with operating couplers and metal wheels
- refrigerated box car with operating couplers and metal wheels
- caboose with operating couplers and metal wheels
- 60" x 40" oval of snap-fit track with roadbed
- 80 watt AC transformer to power train and accessories featuring whistle, bell and direction buttons
- illustrated instruction manual

60" x 40"
Oval

**Powerful 80 Watt AC Transformer
Featuring Whistle, Bell, and Direction Buttons**

80 Watt Transformer and Industrial Rail Track® Pieces are supplied by Atlas O, LLC® for Williams by Bachmann®

This complete and ready-to-run O gauge train set includes:

- Alco FA-2 locomotive with operating headlight, dual motors, and digital True Blast II® horn and bell sounds
- two streamlined coach cars with lighted interiors and passenger silhouettes
- streamlined observation car with lighted interior and passenger silhouettes
- 60" x 40" oval of snap-fit track with roadbed
- 80 watt AC transformer to power train and accessories featuring horn, bell and direction buttons
- illustrated instruction manual

Lakeshore Limited

Ready-to-Run Electric Train Set

Item No. 00324 • Suggested price: \$399.95

Smoothly running along two Great Lakes and the Hudson River, New York Central's famed Lake Shore Limited followed the "Water Level Route" from New York City to Chicago. This set features a steam locomotive with die-cast boiler and chassis, snap-fit track with roadbed, and a powerful 80-watt AC transformer in a complete ready-to-run package.

Santa Fe Flyer

Ready-to-Run Electric Train Set

Item No. 00321 • Suggested price: \$299.95

The Santa Fe railroad was widely known for its passenger train service in the first half of the 20th century. Wearing its distinctive "war bonnet" paint scheme, the *Santa Fe Flyer* is ready for a run from Los Angeles to Chicago and back again. This set features a dual-motor diesel locomotive, snap-fit track with roadbed, and a powerful 80 watt AC transformer in a complete ready-to-run package.

PETER WITT STREETCAR

NAVIGATES O-21 CURVES
LENGTH 11.5" • HEIGHT 3" (with trolley pole lowered)

TRADITIONAL
LINE

- all-wheel drive
- precision can motor with two flywheels
- hidden drive train and electronics
- painted interior with seats
- photo-etched brass safety screen
- digital trolley bell
- electronic reversing unit

While serving as Cleveland's Street Railway Commissioner, Peter Witt designed an all-steel, single-operator streetcar that distinguished itself from others of the era by its use of the center door as an exit only. Passengers could pay the waiting motorman as they boarded at the front and exited at the center of the car, an arrangement which reduced stop times, improved schedules, and increased efficiency. Though designed originally for Cleveland, the Peter Witt Streetcar went on to service in cities throughout the world from the 1930s until the early 1960s.

- etched metal grills covering side vents and roof fan
- die-cast operating front couplers

Struggling to compete with GM's dominance, Alco introduced its first diesel locomotive, the FA-1 in 1945. Alco realized that there was a tremendous demand to satisfy from the railroads phasing out steam power. The unit was designed as a dual purpose locomotive suitable for freight and passenger service. Alco produced almost 700 units from 1945 - 1950 for railroads all over the country.

- Mars light headlights
- add-on detail
- operating front couplers

In 1937 General Motors introduced the first "E" series diesel locomotive. The 2000 H.P. units were designed for high speed passenger service. E7 production began at the end of World War II, with more than 400 units built from 1945 until 1949. The E7 was purchased by almost every major railroad and quickly became the most popular passenger loco ever built.

- True Blast II® digital horn and bell
- durable ABS plastic shell

- die-cast trucks, truck sides, pilots, and fuel tank
- dual headlights
- prototypical wire-form handrails
- die-cast operating couplers

GM retook the horsepower lead in 1965 with the introduction of the SD45 locomotive. They equipped it with a new 20-cylinder engine designed after a Japanese marine engine, the largest power plant ever used in a locomotive. The SD45 was able to generate 3600 H.P., a 20% improvement over the SD40 model.

- dual headlights
- sturdy stamped metal handrails

The GP, or General Purpose, class was introduced in 1949. General Motors built more than 4000 GP models for more than 45 railroads over the next 12 years. This locomotive is so versatile that many railroads rebuilt them and continue to use them today, over 40 years later. Ours is true to scale size and will operate on curves as tight as O-27.

GENERAL ELECTRIC DASH 9 SCALE DIESELS

NAVIGATES O-31 CURVES
LENGTH 17.75" • HEIGHT 3.875"

TRADITIONAL
LINE

- 6 wheel power trucks with traction tires
- powered by dual motors
- flywheel coasting action
- all metal gears
- electronic 6-amp reverse board
- True Blast II® digital horn and bell

- durable ABS plastic shell
- die cast trucks, truck sides, and pilots
- dual headlights
- sturdy stamped metal handrails

GE's C44-9W is the locomotive's official designation, but it is commonly referred to as the Dash 9. You'll likely see one of these modern giants on the rails today. Put one to work on your railroad and see how easily it pulls even the heaviest of loads!

GENERAL MOTORS BL-2 SCALE DIESELS

NAVIGATES O-27 CURVES • LENGTH 15" • HEIGHT 4"

TRADITIONAL
LINE

- 4 wheel trucks with traction tires
- powered by dual motors
- flywheel coasting action
- all metal gears and wheels
- electronic 6-amp reverse board
- True Blast II® digital horn and bell
- durable ABS plastic shell
- die-cast trucks, truck sides, pilots, and fuel tank
- dual headlights
- die-cast operating couplers,
- 19 individually installed grabrails and handrails.

In 1948, the Electro-Motive Division of GM debuted a new concept to American railroads: the BL-2 locomotive. Offered as an all-purpose solution for "branch line" service, it was a redesigned car body on a modified F3 chassis. It offered the engineer greater visibility to the rear of the locomotive. They were costly to build and maintain, but the idea was revolutionary, making this locomotive a historical milestone towards the development of the prolific GP series introduced the following year. Only 59 units in total were built. Several are preserved in museums and a few are still used to pull scenic railroads.

DID YOU KNOW?

When locomotive manufacturers introduce a new model, they make a demonstrator model available to interested railroads so they can try it out. Only one BL-2 Demonstrator was built, and it was later sold to Chicago & Eastern Illinois. You can use our BL-2 Demonstrator with any railroad on your layout and still be prototypical!

FAIRBANKS-MORSE TRAINMASTER SCALE DIESELS

NAVIGATES O-31 CURVES • LENGTH 17" • HEIGHT 4"

TRADITIONAL
LINE

- 6 wheel trucks with traction tires
- powered by dual motors
- flywheel coasting action

- electronic 6-amp reverse board
- True Blast II® digital horn and bell
- durable ABS plastic shell
- die-cast trucks, truck sides, and fuel tank
- dual headlights
- die-cast operating couplers
- wire handrails

Fairbanks-Morse introduced the TrainMaster in 1953. These 2400 H.P. locomotives were another horsepower milestone for FM, towering over other locomotives of the time in both size and power. Our models' good looks and powerful drive-train live up to the legendary TrainMaster name.

In 1939, GM's Electro-Motive Division introduced two switcher locomotives, the NW-2 and its smaller sibling the SW-1. The NW-2 was equipped with a 1000 H.P. 12-cylinder engine. It was GM's most popular switcher of all time, with over 1100 units sold. The last unit was manufactured in December of 1949. Many railroads and shortlines have rebuilt these units due to their flexibility and reliability.

GE entered the road switcher market in 1960 with the introduction of their "U"(Universal) line of diesels. Their goal was to offer replacement diesels for the aging fleet of first-generation diesels. This model group was quickly nicknamed "U-Boats." The U33C Diesel was first produced in 1968 with 3300 H.P. and sporting large radiator wings to make it easily distinguishable from earlier model U-Boats.

In 1937, new railroad regulations required two men to operate any locomotive weighing more than 90,000 pounds. Starting in 1940, GE built this miniature switcher to supply the railroads with the largest diesel that one man could operate. Over the years, 44-ton locomotives were built by many manufacturers, but GE sold the vast majority. Ours is a great entry-level item for you, your children, or grandchildren.

- dual headlights
- prototypical wire-form handrails
- die-cast operating couplers

Originally built for passenger service at the request of the Santa Fe, this 3600 H.P. unit was later used for freight service as well. The locomotive was basically a SD-45 with a different body. The original purchasers of these locomotives were Santa Fe and Milwaukee Road, but they later wore different paint schemes as railroads merged and locomotives were sold or traded-in for newer units.

LINE

SOUTHERN PACIFIC DAYLIGHT
Item No. 40001 • Suggested price: \$469.95

The Southern Pacific GS-4 4-8-4 locomotive is probably the most recognized streamlined steam locomotive ever built. This large Northern Class locomotive allowed Southern Pacific to reduce the travel time more than 25% from 14 hours down to 10 hours.

- 8 drive wheels with 2 traction tires
- powered by powerful single motor
- flywheel coasting action
- all metal wheels and trucks
- electronic 6-amp reverse board

- True Blast II® digital whistle and bell
- smoke unit
- constant voltage headlight
- die-cast engine
- 12 wheel tender with water scoop

S2 TURBINE SEMI SCALE STEAMER

NAVIGATES O-27 CURVES • LENGTH 20" • HEIGHT 3.5"

PENNSYLVANIA RR - GREEN #6200
Item No. 40401 • Suggested price: \$399.95

- 8 drive wheels with 2 traction tires
- powered by single powerful motor
- flywheel coasting action
- electronic 6-amp reverse board
- True Blast II® digital whistle and bell
- nickel plated detail parts
- smoke unit
- constant voltage headlight
- die-cast engine
- 12 wheel tender with water scoop

S2 #6200 was the only S2 turbine model ever built for the Pennsylvania Railroad. The prototype's radical experimental design included forward drive and reverse turbines. Although it was a powerful engine, its uneconomical fuel consumption and the rise of diesels ended its run after only 5 years of service.

BERKSHIRE SEMI SCALE STEAMERS

NAVIGATES 0-31 CURVES • LENGTH 19.5" • HEIGHT 3.75"

TRADITIONAL
LINE

- 8 drive wheels with 2 traction tires
- powered by a powerful single motor
- steel-rimmed wheels
- electronic 6-amp reverse board
- True Blast II® digital whistle and bell
- die-cast operating coupler
- smoke generator
- Baldwin disc drive wheels
- die-cast trucks
- wire-form handrails and grabrails
- smoke fluid included
- die-cast locomotive and tender

First introduced in 1927, the 2-8-4 Berkshire was designed and built by both Alco and Lima. The newly designed 4-wheel trailing truck allowed for a larger boiler that developed much more steam. Even though only 750 Berks were made, they were popular for longer than most other steamers built in the same era. The last Berkshire was built in 1949 by Lima.

- all metal gears
- electronic 6-amp reverse board
- True Blast II® digital horn and bell

- die-cast shell
- die-cast trucks, truck sides, and pilots
- dual headlights
- twin operating pantographs
- add-on stamped metal ladders

Always at the top of the Christmas wish list, this locomotive continues to be a popular choice year after year with good reason—the GG-1 is one of the most prized postwar Lionel items. According to *Greenberg's Guide to Lionel Trains 9th Edition*, a basic single-motor Postwar GG-1 excellent condition will cost you at least \$750, and double-motor examples sell for more than \$1200! Here is your chance to own an exact reproduction at a very affordable price. We have been proud to offer the GG-1 in our product line for more than 20 years.

GENERAL ELECTRIC EP-5 SCALE ELECTRICS

NAVIGATES 0-31 CURVES • LENGTH 16.5" • HEIGHT 4.25"

TRADITIONAL
LINE

- 6 wheel power trucks with traction tires
- powered by dual motors
- flywheel coasting action
- all metal gears
- powdered metal wheels
- electronic 6-amp reverse board
- True Blast II® digital horn and bell
- durable ABS plastic shell
- die-cast trucks, truck sides, and pilots
- dual headlights
- twin operating pantographs

These handsome units first graced the rails in early 1955. Aptly named the "Jet," these models of the 4000 H.P. General Electric prototype feature 6 wheel trucks, operating pantographs, and scale proportions.

Williams[™]

by BACHMANN[™]

Golden Memories Series

The Williams by Bachmann[™] *Golden Memories* series is comprised of replicas of the most memorable O Gauge trains of the postwar period. These models are sure to bring back memories of a bygone age when model trains were built to last. They have all of the premium features of the originals, including die-cast frames, wire mesh vents, and steel-rimmed drivers on the steam locomotives. In addition, the mechanisms and electronics are time-tested designs that incorporate modern maintenance-free can motors, metal gears, and trouble-free electronics that are backed by a limited lifetime warranty.

The Williams by Bachmann[™] *Golden Memories* series makes it possible for you to own iconic trains at an affordable price with the knowledge they will be passed down for generations to come.

*The **Collector's Value** is the price you would pay for the original product if you were to buy it today in "like-new" condition.

E-Z STREET™

The *E-Z Street™* modular system snaps together to create realistic one-lane or two-lane roads and intersections. Now your model town or city can get moving with the *E-Z-Street™* track system and *E-Z-Street™* vehicles.

E-Z STREET™ VEHICLES

- operates on O Gauge *E-Z Street™* track system and straight or curved three-rail track
- may also operate on some three-rail turnouts and crossovers
- length 4.5"; height 2"

J 4-8-4 DIE-CAST LOCOMOTIVE & TENDER WITH 5 FREIGHT CARS
Item No. 00304 • Suggested price: \$599.95

Classic Reproduction Series

Locomotive Features:

- length 14"; height 4"
- powered by dual can motors
- flywheel coasting action
- all metal gears
- electronic 6-amp reverse board
- True Blast II® digital horn and bell
- die-cast body, trucks, truck sides, and pilots
- die-cast operating couplers
- twin manually operated pantographs
- dual headlights and illuminated marker lenses
- separately applied stamped metal ladders

Passenger Car Features:

- car length 15.5"; height 3.25"
- durable ABS plastic shell
- die-cast 6 wheel trucks
- silhouette window strips
- die-cast operating couplers
- illuminated with 2 lights per car
- observation car has rear platform and awning

Locomotive Features:

- smoke
- 6-amp reverse board
- powerful motor with flywheel
- traction tires
- constant voltage lighting

Tender Features:

- durable ABS body
- True Blast II® digital whistle and bell
- operating coupler
- die-cast 6 wheel trucks

Freight Cars Included:

- 6464-450 Great Northern boxcar
- 6446-25 Norfolk & Western covered hopper with interchangeable coal load
- 6464-475 Boston & Maine Boxcar
- 6425 Gulf Oil* triple-dome tank car
- 557733 Norfolk & Western N5c illuminated caboose

Train includes one each of the above freight cars.

All freight cars feature die-cast trucks with operating couplers.

THE FM TRAINMASTER

GOLDEN
memories

Wow! What a breath-taker...charging up a grade...rounding curves at breakneck speed...sounding her reverberating horn! Astounding traction tires make it virtually impossible to "jump the tracks" and gives so much "pullability" on the hills that she doesn't even know the difference!

Locomotive Features:

- length 16 $\frac{7}{8}$ "; height 4"
- durable ABS plastic shell
- 6 wheel trucks with traction tires
- dual can motors with flywheel coasting action
- electronic 6-amp reverse board
- True Blast II® digital horn and bell
- die-cast fuel tank, trucks, truck sides, and pilots
- die-cast operating couplers
- dual headlights on each end of locomotive
- wire-form chrome-plated handrails
