TurboTrain

NORTH AMERICA'S FASTEST TRAIN

Preproduction model shown.

ACCURATE.

We designed our models with the help of two senior designers from the original United Aircraft TurboTrain team.

EXPANDABLE.

The TurboTrain can be expanded up to nine cars long. Additional coaches are available for all paint schemes.

For CN and VIA trains, we offer special Turbo TwoPacks—TurboClub and TurboCafé cars together for a reduced price.

AFFORDABLE.

A complete, sound-equipped train with two engines... for about the same price as a steam locomotive.

TurboTrain

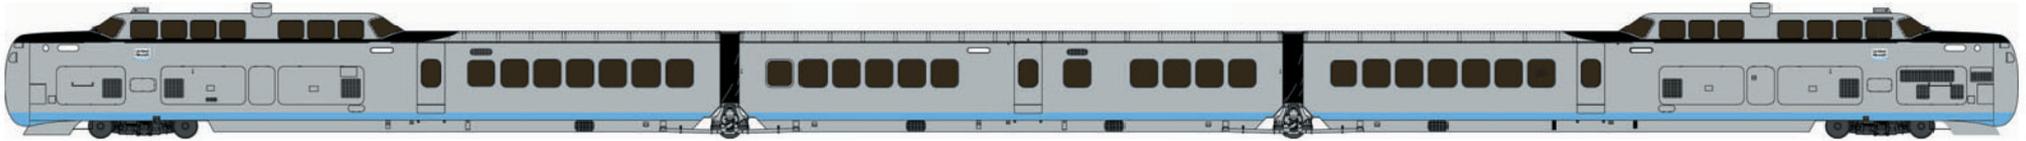

NORTH AMERICA'S FASTEST TRAIN

New Haven/Department of Transportation TurboTrain

Operated 1967-1968

PRODUCT NUMBER: 200001

PDC-28 - TurboCoach Power Dome Car

CAR NUMBER: UAC-1

IC-29 - TurboCafé-Coach

NO CAR NUMBER

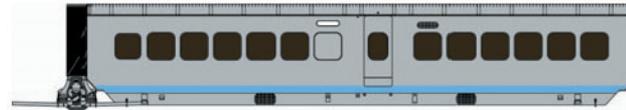

PDC-29 - TurboCoach Power Dome Car

CAR NUMBER: UAC-1

Prototype photograph by Robert A. LaMay.

New Haven/DOT Extra Intermediate Cars

IC-36/37 - TurboCoach

PRODUCT NUMBER: 200101

NO CAR NUMBER

In this first paint scheme, the TurboTrain achieved its phenomenal 170.8 MPH speed record on PRR tracks in New Jersey.

Despite several attempts to surpass this speed, including a recent well-publicized try by Amtrak's Acela, the TurboTrain is still the fastest production train in North America.

At left: A poignant photograph for New Haven fans—the TurboTrain was the New Haven's last new train.

TurboTrain

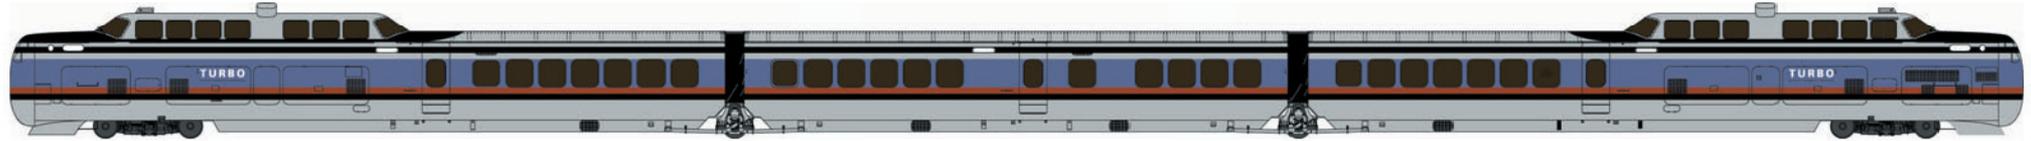

NORTH AMERICA'S FASTEST TRAIN

Penn Central TurboTrain

PRODUCT NUMBER: 200002

Operated 1968-1971

PDC-28 - TurboCoach Power Dome Car

CAR NUMBER: 52

IC-29 - TurboCafé-Coach

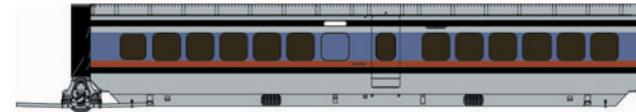

CAR NUMBER: 71

CAR NUMBER: 70

PRODUCT NUMBER: 200202

CAR NUMBER: 72

TurboTrain:

The only train for the aircraft collector in your family.

Each Power Dome Car houses two or three Pratt & Whitney ST-6 turbines. With its twin, the PT-6, this engine is used in airplanes, helicopters, and countless ground applications.

TurboTrain

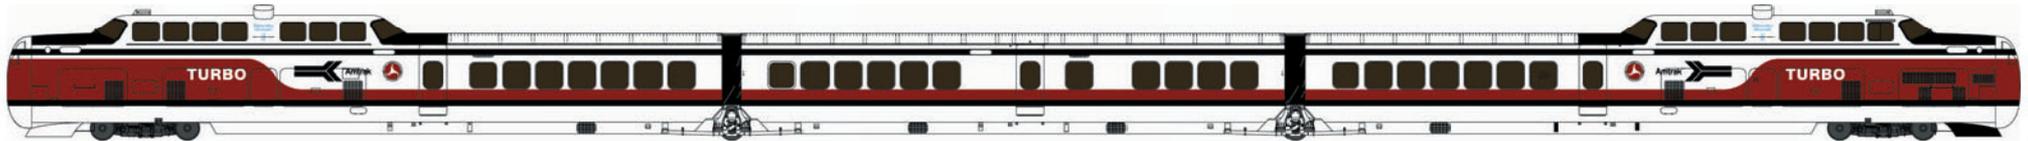

NORTH AMERICA'S FASTEST TRAIN

Early Amtrak TurboTrain

PRODUCT NUMBER: 200003

Operated 1971-1973

PDC-28 - TurboCoach Power Dome Car

CAR NUMBER: 50

IC-29 - TurboCafé-Coach

CAR NUMBER: 71

PDC-29 - TurboCoach Power Dome Car

The TurboTrain has come to town—and everyone has come to see it!
Prototype photograph by Sikorsky Aircraft.

Early Amtrak Extra Intermediate Cars

IC-36/37 - TurboCoach

PRODUCT NUMBER: 200301

CAR NUMBER: 70

PRODUCT NUMBER: 200302

CAR NUMBER: 72

Early Amtrak TurboTrains operated in 3-car and 5-car configurations.

When Amtrak was only three months old, the **TurboTrain** was decked out in this striking new paint scheme for a tour of the USA, bringing Amtrak's promise of modern passenger rail service to the nation. **See photo at left.**

This was an important moment in American railroad history, and it means that TurboTrain fans hail from all across the United States.

TurboTrain

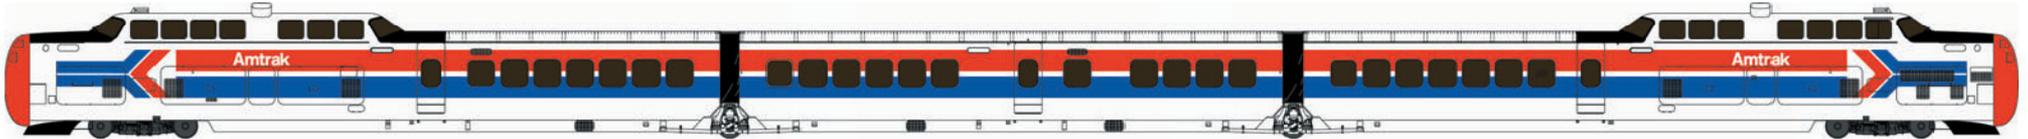

NORTH AMERICA'S FASTEST TRAIN

Late Amtrak TurboTrain

PRODUCT NUMBER: 200004

Operated 1973-1976/80

IC-30/35 - TurboCoach

PRODUCT NUMBER: 200601

PRODUCT NUMBER: 200602

CAR NUMBER: 256

CAR NUMBER: 261

IC-31 - TurboCafé and IC-33 - TurboClub

PRODUCT NUMBER: 200603

PRODUCT NUMBER: 200604

CAR NUMBERS: 226 + 201

CAR NUMBERS: 228 + 203

Prototype photograph by Canadian National.

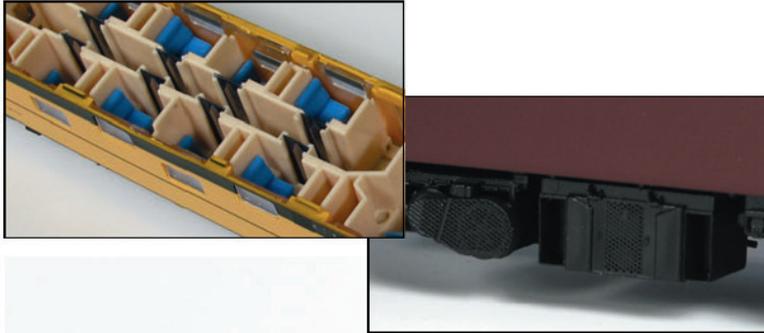

VIA Rail Canada ran its "Turbos" in 9-car configurations.

**To make a 9-car train, you will require:
200006, 200501, 200502, 200503, and 200504**

**With the retirement of VIA's last Turbos,
the TurboTrain era was over...**

UNTIL NOW.

THE ONLY THING MISSING IS REAL STEAM HEAT. (but that would probably melt the plastic, so it's best we leave it off for now)

OUR SUPER-DETAILED HO-SCALE PASSENGER CARS FEATURE:

- Detailed underbody with separate steam, air and electrical lines
- Factory-applied and painted (where applicable) grab irons as well as uncoupling levers
- Fully detailed interior cast in appropriate colors
- Battery-powered LED lighting operated by magnetic wand (included)
No drain on track power • No flicker • DC or DCC • On or Off
- Separate, removable marker lamps and end gates
Modelers can assign different cars to be the "last car" of the train
- Scale-sized knuckle couplers and operating diaphragms with support bars
- 18" minimum radius (24" or greater recommended)
- Several car names/numbers available for each railroad and type of car

CAR STYLES CURRENTLY IN PRODUCTION

**LIGHTWEIGHT COACH - "E" SERIES DUPLEX SLEEPER
CAFÉ-BAR-LOUNGE - "BAY" SERIES 10-5 SLEEPER
ADDITIONAL CAR STYLES AVAILABLE IN 2008**

UPGRADES

REPLACEMENT ALKALINE BATTERIES

Product # 102000

WHY CHOOSE BATTERY-POWERED LIGHTING?

- No more flickering lights over turnouts and other dead spots
- No more drain on your power supplies caused by fleets of lit passenger cars
- No more drag caused by friction-causing wipers
- The ability to turn car lighting on and off with ease and without the hassle and cost of installing a decoder in each car

UPGRADES

SUPER-DETAILED PASSENGER CAR TRUCKS

Product # 102001

- 41-BNO-11 4-wheel, outside-swinghanger trucks built by General Steel Castings and Canadian Car & Foundry
- Most common trucks used on new cars and rebuilt older cars after 1946
- Detailed on all four sides with 8 separately-applied parts per truck
- Slippery Celcon plastic bearings so these babies roll!
- Insulated RP-25 wheelsets **INCLUDED**

UPGRADES

"Easy Peasy" BATTERY POWERED LIGHTING

Product # 102003

Step 1: Remove from package.
Step 2: Insert batteries (included).
Step 3: Place in roof of passenger car.
Step 4: There is no step 4. You were done at step 3.

NO WIRING. NO SOLDERING. NO FLICKER. NO HASSLE. NO PROBLEM.

Wave the Rapido Lighter (included) over the roof to turn the lights on and off. It's Easy-Peasy!

Good for passenger cars HO scale and larger, large scale cabooses and buses, platform shelters and 7,962 other uses!

LRC Coach

Product # 003

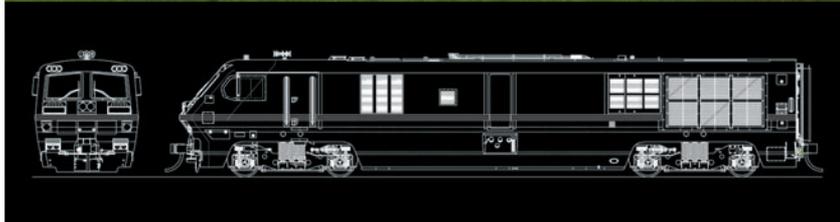

Bombardier LRC Coach: Light, Rapid, Comfortable

The Bombardier LRC was the first train to successfully incorporate a banking system to increase speed and comfort around curves on conventional track. The LRC was operated by Amtrak in the Northeast Corridor in the early 1980s. Up until the late 1990s, the Amtrak LRC coaches (in VIA paint) worked the Chicago-Toronto "International" service. In Canada the LRC had a tremendous impact. The LRC became the hallmark of VIA Rail Canada's improved Corridor services, and the LRC coaches are still the largest single car type owned by VIA.

Rapido Trains Inc. entered the model train business with our revolutionary LRC coach, one of the most accurate resin passenger car kits ever produced.

LRC Locomotive

Product # 005

Bombardier LRC Locomotive

Rapido Trains Inc. is producing a limited run of the LRC Locomotive for delivery in 2008. This is a high quality, undecorated kit.

Locomotive Features:

- Two-piece, thin-walled resin body
- DCC-ready drive including can motor and flywheels
- Assembled and pre-wired chassis and trucks
- Light bulbs for headlights, marker lights, ditch lights and backup light
- Accurate proportions and details, down to the roof rivets!
- Correct Dofasco truck sideframes and 36" wheelsets
- Scale-sized knuckle couplers at the correct height
- Working diaphragm
- Etched, see-through grills
- Numerous etched and cast details as appropriate
- VIA Rail LRC Locomotive decals included
- Amtrak LRC Locomotive decals sold separately

VIA Rail HEP2 Decals
Product# 001

Desperate for new equipment to service its busy Corridor, VIA Rail Canada in the mid-1990s bought and rebuilt a fleet of American Budd-built coaches. These HEP2 decals allow you to decorate the Budd coaches of your choice in this attractive scheme. Each set completes one coach.

VIA Rail LRC Coach Decals
Product # 002

To complement our LRC Coach kit, we have produced super detailed decals. Almost every decal ever used on the prototype cars is provided, allowing you to customize your coach to any period. Each set completes one coach.

Amtrak LRC Coach Decals
Product # 004

We're not only VIA fans, we love Amtrak too! Decorate your LRC Coaches in Amtrak colors with our Amtrak LRC decal set. Each set completes one coach.

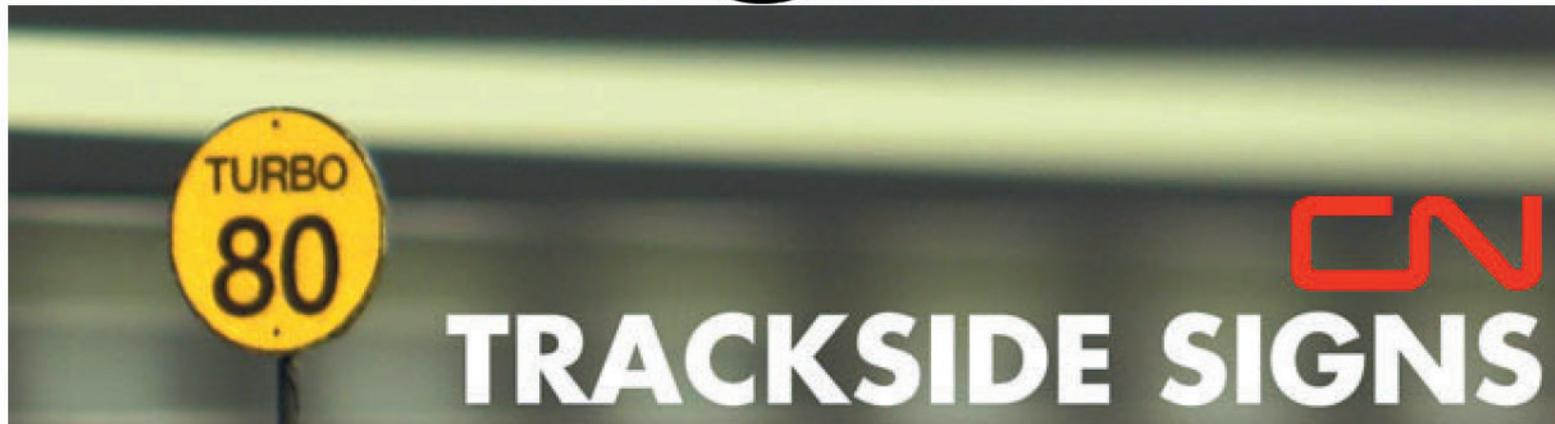

VIA Rail LRC Loco Decals
Product # 006

Dress up your LRC locomotive with a set of our decals. Comes with every decal that was ever used on the prototype. Each set completes one locomotive.

Amtrak LRC Loco Decals
Product # 007

Frequently seen between Boston and New York in the early 1980s, Amtrak's LRC wore this variation of Amtrak's Phase 3 scheme. Each set completes one locomotive.

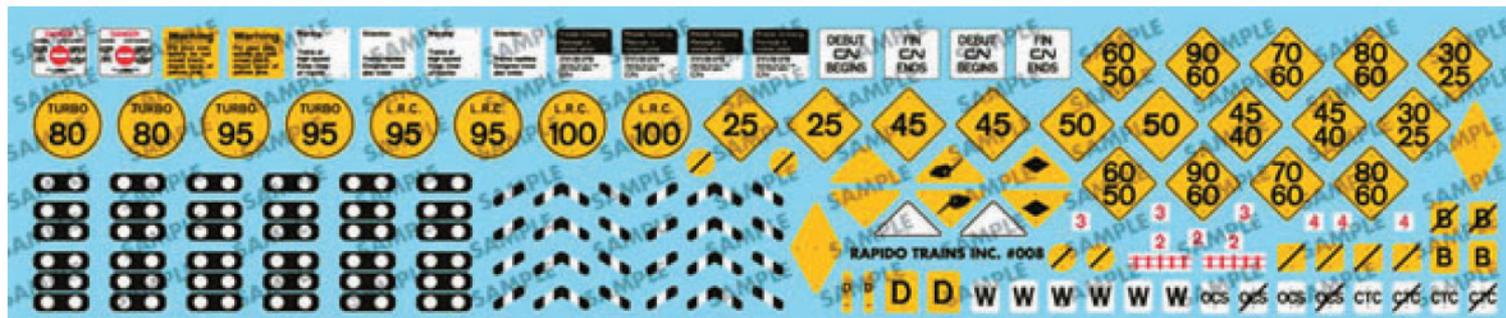

CN Trackside Signs

Product # 008

Trackside signs are a common sight along rights-of-way around the world, used for posting vital information to both railroad employees and the general public. There is a sign for everything from grade crossings to speed limits and station locations.

Our CN Trackside Signs are a comprehensive set of decals that come with laser-cut backing and poles. **Your signs can be up on your layout in minutes!**

Our decals include a variety of signs used by almost all Canadian and several US railways. For example, you can let your operators know where to lift a plow blade or where a particular type of signaling ends.

Decal sample shown. Final product may differ.
